Allowable Subject Matter

- 1- Claims 1-21 are allowed.
- 2- The following is an examiner's statement of reasons for allowance:

The primary reasons for the allowance of the independent claim 29 are the inclusion of the following limitation that is not found in the prior art and they are uniquely distinct features. The closest prior arts are McNeill et al (6,167,052), Ahmed et al (5,432,785) and Nessett et al (5,968,176). McNeil discloses methods and systems for establishing network connectivity by creating virtual LANs within a domain. Ahmed discloses a broadband VPN system in which customers are connecting to a switching system through at least one VPN connection. Nessett discloses a system for providing security in a network that includes nodes operating in multiple protocol layers and security policies are applied to the communication between the end point stations. These three arts, singularly or in combination, fail to anticipate or render the following limitation:

"Claim 1: associating at least one of said computer resources in said shared computer system with each of said plurality of virtual local area networks, whereby a domain for each of said plurality of client computers is extended to include said computer resources in said application service provider and said plurality of client computer domains are isolated from each other within said application service provider."

"Claim 16: at least one virtual private network termination device electrically connected to said at least one virtual local area network switch, wherein said at least one virtual local area network switch is configurable to changeably connect a plurality of virtual private network connections in said at least one virtual private network termination device to at least one of said plurality of computer resources while isolating said plurality of virtual private network connections from one another."

3. The dependent claims 2-15 and 17-21 are allowed because they were originally found to include a unique feature not found in the closest abovementioned art.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
